

FACTSHEET

Nexus Regional Dialogues Programme

PROJECT DETAILS

Project Name: Nexus Regional Dialogues (NRD) Programme Phase II

Joint Co-financing: European Union (EU), German Ministry for Economic Cooperation and Development (BMZ)

Duration: July 2020 – June 2023

Target Regions	Implementing Agencies	Partners
Central Asia	Regional Environmental Centre for Central Asia (CAREC)	National Partners in Central Asia
Latin America and the Caribbean (LAC)	Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)	National project implementation partners Economic Commission for Latin America and the Caribbean (ECLAC)
Middle East and North Africa (MENA)	Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)	League of Arab States (LAS)
Niger Basin	Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)	Niger Basin Authority (NBA)
Southern Africa	Global Water Partnership Southern Africa (GWP-SA)	Southern African Development Community (SADC)

Vision: Inclusive water, energy and food security on the path to a climate resilient and resource efficient future for all

– Vision of the NRD Programme

CONTEXT

Access to natural resources and healthy ecosystems is essential for human wellbeing, dignity and sustainable livelihoods. Natural resource management and governance are, however, highly complex and water, food, and energy security are multifaceted.

Worldwide, **scarce natural resources and the environment are increasingly exploited** while at the same time the **demand for freshwater, agricultural products and energy is rising**. Inequalities in the distribution and access to water, energy and food are **exacerbated by the impacts of climate change**.

Agriculture uses the major share (69%) of global freshwater resources¹

30% of global energy consumption is used for food production and supply²

90% of global power generation is water-intensive³

¹ UNESCO (2021); ² FAO (2011); ³ UN (2014)

THE WATER-ENERGY-FOOD NEXUS APPROACH

The Water-Energy-Food (WEF) Nexus approach addresses this complex reality and recognises that water, energy and food security can only be achieved through safeguarding, protecting and upholding natural resources. It contributes to a better understanding of the deep interconnectedness between natural resources and their planning, management and consumption. For example, pumping to irrigate crops can lead to over-exploitation of water resources. The cultivation of biofuel crops, while they provide renewable alternatives to fossil fuels, can compete with food production for land and water.

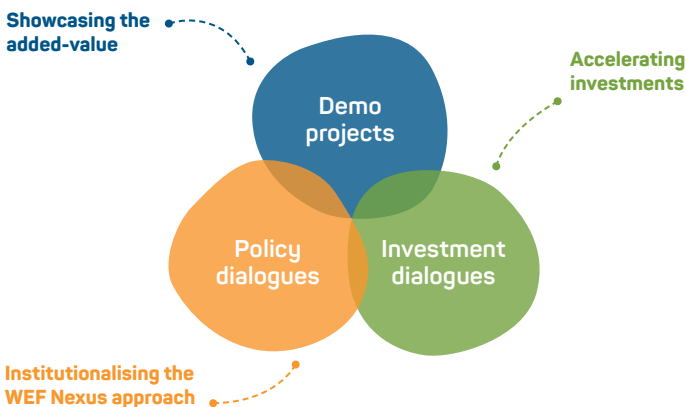

At its heart, the WEF Nexus promotes a holistic and integrated way of thinking and acting to ensure inclusive water, energy and food security in a sustainable way. It draws attention to opportunities: untangling trade-offs, inspiring compromises and uncovering synergies. It further promotes policy coherence and multi-sectoral cooperation at all levels.

OBJECTIVES

Building on the results of Phase I, the Nexus Regional Dialogues Programme Phase II aims to institutionalise the WEF Nexus approach in national and regional governance structures and investment decisions and to engage the public and private investors for WEF Nexus projects.

APPROACH AND ACTIVITIES

The Nexus Regional Dialogues Programme is implemented in Central Asia, Latin America and the Caribbean, Middle East and North Africa, the Niger Basin and Southern Africa in cooperation with regional partner organisations.

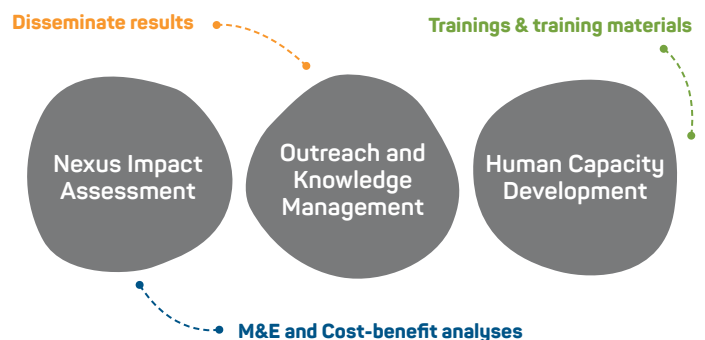

“Nexus mainstreaming can only be achieved through participatory approaches. Continued stakeholder dialogues and validation of data and information foster cross-sectoral exchange and mutual understanding.”

– Mariana Rodriguez, Head of NRD Programme, GIZ

Together with its regional partners, the Nexus Regional Dialogues Programme assists stakeholders to bring the WEF Nexus approach to the mainstream of governance and investment. Concrete policy recommendations and governance frameworks for an integrated natural resource management are developed. Furthermore, investment opportunities for multi-sectoral projects are identified. In order to complement this work with evidence-based arguments, the programme contributes to the operationalization and impact assessment of WEF Nexus demonstration projects in the regions.

Through innovative training, the Nexus Regional Dialogues Programme builds both enthusiasm and capacity for multi-sectoral WEF Nexus decision making and investment planning. Hands-on tools, guidelines and best practices to take the WEF Nexus approach from theory to practice, are disseminated through participation in international events and the Nexus Resource Platform (www.water-energy-food.org).

The Global Nexus Secretariat based at GIZ headquarters in Germany, supports the five Nexus Regional Dialogues with technical assistance and facilitates cross-regional exchange and learning.
